Forecast for Friday 17 Sep 2021

Weather: Early low cloud, and the odd mist patch soon clearing. Otherwise, bright and breezy especially on tops. Turning cloudier through the afternoon, but likely staying dry until at least the evening. A chance of rain or drizzle then moving into western hills.

Chance of cloud free mountain/hill tops above 600m: 30% at first, improving to 80% by midday. Falling again to 60% in the west by late afternoon.

Visibility: Very poor across most hills at first, with cloud obscuring tops above 500m, and occasionally as low as 300m, and some mist patches possible in valleys. This lifting during the morning, with generally good to very good views developing, but staying poor above 600m at times with further patchy cloud. Cloud thickening further across western hills during the evening above 500m, with visibility falling to moderate in any rain.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Dry for much of the day, but limited views from the tops and with an increasing chance of rain later in the day. If rain does set in, it is likely to persist thereafter, so waterproofs essential.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Fri 17 Sep 2021	0.2mm	0.2mm	0.6mm

Forecast for Saturday 18 Sep 2021

Weather: Cloudy with light rain and drizzle through the morning, likely persistent across many western slopes. Some drier and brighter intervals developing into the afternoon, especially in the east, and giving some warm sunny spells. Heavier showers also developing, however. These showers then slowly fading throughout the evening and night.

Maximum wind: Southerly 10-20mph

Chance of cloud free mountain/hill tops above 600m: 20% at first, rising to 60% in west and 80% in east by the afternoon

Visibility: Very poor across summits especially at first with cloud obscuring hills above 500m, and occasionally those above 300m in the west. Also moderate to poor at lower levels during more persistent rain or drizzle, especially in west, Some good views possible during drier intervals, mainly in the east during the afternoon and away from showers.

Temperature: **Valleys:** Plus 12 Celsius, rising to Plus 21 Celsius.
At 600m: Plus 10 Celsius, rising to Plus 14 Celsius.
Freezing level: Above the summits.
